

## School Holiday Art-To-Go Packs: Make your own Crab hat!

You will need the below items from home:

- Pair of scissors
- Sticky tape/glue
- Black felt-tip/vivid

Find these items in the bag:

- One A4 coloured template
- Two small pieces of paper for the eyes

How to make it:

- Cut out your template pieces. You will have two large rectangles for the headband, two crab pincers, eight legs, and two small rectangles for the eye stalks.

To glue the crab's eyes together, you need to:

- Draw two big circles on the smaller pieces of paper, then cut them out. Draw and colour a circle with your black felt-tip on each one. Making the eyes point in different directions can add some fun! Then glue or tape the large eyes onto the back of the smaller rectangles. Once finished, glue or tape the eye stalks onto the back of large rectangle front headband piece.
- Now attach the crab's pincers. These can be glued in different positions, too, if you like.
- To make the round crab headband, tape or glue the second large rectangle onto the first at either side. You can measure around your head to get a good fit.
- Cut out the crab's other eight legs and fold them into small zig zags.
- Tape or glue the legs onto the inside of the headband, at the sides.
- Finish off your crab's face by drawing on a smile with your black pen.

Now your cute and fun crab hat is ready to wear! Isn't it adorable?
